Mike,

The SCGIP is specific to the timing in question. It's just not something we can extend.

Matt,

Thanks again for the productive call today regarding the Jackson and Barnwell needed IA amendments.

Section 5.2.4 of the South Carolina Interconnection agreement reads;  
The Interconnection Agreement shall specify milestones for payment and financial security that are required prior to the start of design, equipment procurement and construction of Upgrades and Interconnection Facilities.

Payment and Financial Security must be received by close of business forty-five (45) Business Days after the date the Interconnection Agreement is signed by the Interconnection Customer, where failure to comply results in the Interconnection Request being deemed withdrawn.

I understand the Interconnection agreement has been signed but the amendment proposed today by SCE&G does adjust the scope and monetary requirements and will require reevaluation. The amended IA will need to be reviewed and signed by Ecoplexus. I think it is a fair ask to request a 10 day extension based on these additional facts.

Could we ask you to please review and consider this request? The IA requirement for payment in the milestone schedule would be adjusted accordingly. I don't see anywhere in the standard where this request couldn't be considered but please let me know if I missed it.

Best,

Michael
